EXPERIENCE

Application Developer at Maritz July 2024 to Present

- Built an MCP server in C# with multi-agent orchestration (tool calls, skills, and a custom agent) to enable AI-assisted debugging across application, API, and SQL Server layers, accelerating full-stack troubleshooting.
- Developed enterprise web applications using C#, .NET MVC, Angular, TypeScript, HTML, CSS, and SQL Server, modernizing business workflows and improving user experience.
- Created 8+ hours of AI training content and supporting documentation to educate engineers on responsible AI adoption, effective tool usage, and integrating AI workflows into their day-to-day development tasks.
- Developed an AI-powered event provisioning CLI using Node.js, TypeScript, and OpenAI APIs to automate repetitive setup workflows to reduce manual developer effort.
- Led a team of 4 engineers, establishing engineering standards, Agile workflows, and reusable architecture patterns to improve code consistency, development efficiency, and delivery speed.

Full Stack Web Developer at Maritz May 2023 to July 2024

- Built and maintained enterprise event registration platforms using Classic ASP, PHP, TypeScript, JavaScript, jQuery, and SQL Server, supporting events with 100K+ attendees.
- Developed backend services and REST APIs to integrate application workflows with database systems.
- Contributed to updates to the internal housing API and advised on implementation strategies for consistent adoption across events.

Full-Stack Web Developer at Imaginal Marketing Group June 2021 to May 2023

- Developed accessible, SEO-focused web applications using PHP, Twig, and JavaScript, improving Core Web Vitals, SEO visibility, and UX/UI across client websites.
- Built a Python-based website monitoring tool that proactively detected site issues and reduced support tickets by 50%.
- Architected a mobile-first SvelteKit progressive web app, styled with Tailwind, that scraped provider websites to recommend relevant products to clients immediately after receiving services, driving additional product sales.
